

Enter the Broadband Era with OPENSKY™

Internet via satellite wherever you are

www.broadsat.com

## What is OPENSKY™?

OPENSKY™ has been developed by Eutelsat, Europe's leading satellite operator. It is the most reliable satellite Internet access and media platform. OPENSKY™ delivers a range of true broadband services to anyone who already has dial-up Internet access. With SatSurf you can surf at ADSL speeds wherever you are. SatTV and SatKiosk deliver streaming channels, software, music, videogames and other digital content straight to your PC, without being connected to the Internet.

### Broadband wherever you are

from €24.00 per month

SatSurf boosts your current dial-up connection to ADSL speeds. After connecting to your ISP, just log on to the OPENSKY™ System and enjoy high speed web surfing.

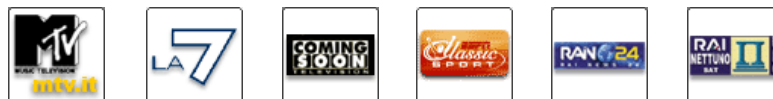

- experience high-speed surfing
- enjoy the full power of media applications on the Internet (Flash, animations, audio)
- download "heavy" pages and large files, music, programmes and any digital content almost instantly

### Content delivered straight to your PC

With SatTV you can watch a selection of European TV channels, catch up on news, listen to music and watch football games on your PC without being connected to the Internet.

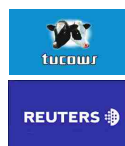

SatTV brings you satellite TV with just one click.

*SatTV channels are free-to-air*

With SatKiosk you can select programmes, videos, music, videogames and other digital files. Once requested, the content is delivered straight to your PC, without being connected to the Internet.

**Programmes:** 10 of the most frequently downloaded programmes from Tu cows every week

**News:** daily news from Reuters, one of the most well-known news agencies in the world

*SatKiosk is free-to-air*

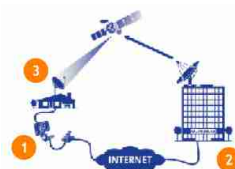

With SatTorrent you can request content of any type. Once requested, the content is delivered straight to your PC, without being connected to the Internet. SatTorrent is your personal off-line file request system. Just enter the URL and receive the content via satellite in off-line mode.

from €15.90 per month

## How does it work?

- Run the OPENSky™ Client to access the Internet
- Your request is received by the OPENSky™ platform, which is connected to the Internet backbone and sends back the data at very high speed over Eutelsat satellites
- Your dish, which is pointed at the satellite that covers your area, receives the data and sends it to your PC via your DVB device

No Internet connection is required to watch SatTV and receive SatTorrent and SatKiosk content. These services are available on your OPENSky™ Client.

### SatTV

- select the type of channel (news, sport, entertainment, music)
- select a channel
- watch the channel on your PC just like normal TV

### SatKiosk

- look up the available content in the guide section
- select the content to download (software, music or other digital files)
- the content will be sent to your PC at the scheduled time and stored on your hard disk

### SatTorrent

- submit your file request on the Internet
- the content is scheduled for transmission (time of transmission)
- you will receive the requested file on your OPENSky™

## What do I need?

a PC with an internet connection

a DVB device

a satellite dish

an OPENSky™ subscription

## Where can I buy a subscription?

You can rely on Broadsat's experience as the first OPENSky™ service provider in the world.
